July 2025

Engineered and integrated scalable RESTful APIs using Spring Boot to improve UI responsiveness across real-world applications Enhanced skills in backend logic, frontend design, and database operations while working on production-ready software.

PROJECTS

AI-Powered-Interview-Assistant| [Link](#) (React, Redux Toolkit, Local Storage)

2025

Developed an AI-based interview simulation platform with resume parsing, timed interviews, automated scoring, and dual-role interfaces using React, Redux Toolkit, and Ant Design.

Pachyderm Partner| [Link](#) (ESP32 | HC-05 Bluetooth Module | Relay Module)

2025

Developed an IoT wearable device for elephants that enhances mahout safety using Bluetooth-controlled vibrators and ESP32-based real-time mobile app integration.

PhishSiren| [Link](#) (Flask, Machine Learning, Gmail API, MongoDB)

2025

Developed a machine learning-based phishing and spam detection web application that integrates with Gmail via OAuth 2.0, performs real-time email classification utilizing a trained Scikit-learn model, and stores prediction history in MongoDB, improving email threat detection efficiency and enhancing user security awareness.
